THE COMPLETE LEAD FREE ROOF FLASHING RANGE

- INSTALL IN FULL 5M LENGTHS
- NON-TOXIC
- LIGHTWEIGHT

WAKAFLEX
'Lead Free' Flexible Flashing

DAKAFLEX
A Fully Adhesive Reinforced Flashing

SMARTFORM
FLEXIBLE ROOF FLASHING AND ALL PURPOSE REPAIR TAPE

OUR LEAD FREE FLASHING RANGE IS

- 🕒 Quicker
- 👉 Easier
- 🪶 Lighter
- 👍 Safer

TO USE THAN LEAD

WAKAFLEX

'Lead Free' Flexible Flashing

The World's Number 1
Lead Free Flashing

Wakaflex is the professional choice for flashing abutments, chimneys, walls and other rising structures

Wakaflex is our premium lead free flashing. Made from an extruded Polymer rubber called Polyisobuthylene (PIB), Wakaflex has the unique ability to chemically bond to itself when overlapped. This creates one continuous waterproof seal for joints and step flashings. No other flashing material available today can provide this level of protection at roof/wall joints. Internally, Wakaflex contains an aluminium mesh that provides rigidity and a lasting memory when dressed to the roof surface. Wakaflex has two butyl sealing strips running along both edges of the roll, and a 3 piece HDPE protective backing. With a three dimensional stretch (up to 50% in length and 15% in width), Wakaflex is designed to replace lead flashing in all its traditional applications and dresses down to any roofing material in a smooth seamless finish.

BEST FOR – New build applications such as abutments, step-flashing, chimneys and Dutch Gables.

- >> Chemically bonds to itself to create watertight seal
- >> Can be used as part of a BAL 29 system
- >> Internal aluminium mesh
- >> Polyisobuthylene rubber (PIB)
- >> 2 self-adhesive butyl strips
- >> Complies with AS/NZS 4020:2005 'Testing of products for use in contact with drinking water'
- >> Complies with AS/NZS 2904:1995 'Damp Proof Courses and Flashing'

FLASHTITES

'Lead Free' Penetration Flashing

Quick & Easy
Watertight Seals

A unique pre-fabricated roof penetration flashing manufactured using a Wakaflex base. Available in 4 sizes to suit all penetrations, Flashtites are available in a range of colours, and can be painted to suit any background colour if required. Flashtites, like Wakaflex, come with a 10 year guarantee.

- Features:**
- >> Non-toxic
 - >> No painting necessary
 - >> Lightweight
 - >> Integral adhesive system
 - >> Quick and simple to install
 - >> Non-corrosive

DAKAFLASH

A Fully Adhesive Reinforced Flashing

A Fully Adhesive Reinforced Flashing

Dakaflash incorporates the reinforced aluminium mesh from Wakaflex with the creped aluminium top sheet and butyl backing from Smartform

Dakaflash is a composite laminate flashing consisting of a creped aluminium top sheet with a 100% self-adhesive butyl backing. Embedded into this adhesive is the same aluminium mesh that's inside Wakaflex. This mesh gives Dakaflash additional rigidity and support, which enables it to have a smoother contoured finish on the roof surface than Smartform. Dakaflash can stretch up to 30% in length and has a two-piece protective HDPE backing.

BEST FOR – Corrugated metal or Polycarbonate (such as verandahs and carport). Perfect for flashing maintenance by going under existing flashing that's prone to leakage.

- >> Internal aluminium mesh
- >> Fully self-adhesive butyl backing
- >> Creped aluminium surface
- >> Complies with AS/NZS 2904:1995 'Damp Proof Courses and Flashing'

SMARTFORM

FLEXIBLE ROOF FLASHING AND ALL PURPOSE REPAIR TAPE

Flexible Roof Flashing and All Purpose Repair Tape

Smartform is a multifunctional and highly flexible flashing repair tape that is ideal for extreme profiles & maintenance

Smartform is made from the same creped aluminium top sheet and self-adhesive butyl backing as Dakaflash, without the reinforced aluminium mesh. It has the most stretch in the range with up to 60% in length and has a two-piece protective HDPE backing.

BEST FOR – Ad-hoc and difficult to flash areas (roof penetrations, ducts and sky lights). Extreme roof profiles (KLIP-LOK metal and trim deck roofing sheets). Roof components such as box gutters and valleys.

- >> Highly flexible – Up to 60% stretch
- >> Fully self-adhesive butyl backing
- >> Creped aluminium surface
- >> Complies with AS/NZS 2904:1995 'Damp Proof Courses and Flashing'

COMPARE OUR FLASHING RANGE

WAKAFLEX 'Lead Free' Flexible Flashing

BEST FOR

- Typical lead installations
- New builds
- Abutments & step-flashing
- Chimneys
- Dutch Gables

DAKAFLASH A Fully Adhesive Reinforced Flashing

BEST FOR

- Metal & Polycarbonate roofs
- Carports & verandahs
- Flashing maintenance

SMARTFORM FLEXIBLE ROOF FLASHING AND ALL PURPOSE REPAIR TAPE

BEST FOR

- Ad-hoc jobs
- Difficult to flash areas
- Extreme roof profiles
- Lining roof components
