

Genesis® VMZinc® Anthra

GENESIS™

ARCHITECTURAL PANELS

Genesis™

Genesis™ is available in single or double seams and can be used for facades or roofing.

With its thin rib and wide tray, it gives a modern appearance using concealed fixing and crimping techniques to lap panels along entire lengths.

The support needs to be ventilated rigid and continuous where all parts of the standing seam panels are laid.

Choose from various materials such as Colorbond®, Zinalume®, Zinc, Copper, Aluminium, Corten and the Uni-Cote® Lux range.

- Original architectural seamed profile
- Single or double seam
- Variable tray widths
- Cut to length daily
- Various materials available

Genesis™ VMZinc® Anthra

CLASSIC - **TIMELESS** - THE ORIGINAL ARCHITECTURAL PROFILE.
